Northeast Laser & Electropolish Receives ISO 13485 Certification

May 2013

Northeast Laser & Electropolish, a Monroe, CT-based company, is pleased to announce that it has obtained ISO 13485:2003 certification from QMI-SAI Global registration services.

Kurt England, one of the founding partners of the organization, issued the following statement:

"Northeast Laser's supply chain management and contract manufacturing services have been steadily growing, so it seemed imperative for us to obtain 13485 certification, especially to satisfy the needs of our growing medical device customer base. After receiving ISO 9001 certification back in 2010, we challenged ourselves to tackle the additional requirements of 13485. I am pleased to announce that we passed our qualification audit without incident."

Northeast Laser & Electropolish provides contract laser processing, electropolishing and passivation services to a wide range of companies, including medical device manufacturers, throughout the United States and abroad. The company has further extended its services by offering supply chain management and complete process validation.

England added, "We feel that this added certification, along with our validated lines and automation expertise, has positioned Northeast Laser to be a preferred manufacturing partner to our current and future customers."
